Aditya Atmaram Sawant

Senior Machine Learning Engineer

adityasawant759@gmail.com | +917718931947 | Mumbai, India | linkedin.com/in/aditya-a-sawant

EXPERIENCE

Senior Machine Learning Engineer
Quantiphi Analytics Solutions Private Limited

04/2025 - Present

- Designed & developed scalable ML models & algorithms tailored for real-time applications across vision and language domains.
- Built and debugged robust ML systems, including deployment workflows, model evaluations, and failure handling pipelines.
- Implemented advanced LLM, RAG, Object detection and tracking solutions, achieving 95%+ accuracy in production.
- Built and optimized end-to-end RAG pipelines using embedding models, rerankers, and Milvus for efficient data retrieval.

Machine Learning Engineer
Quantiphi Analytics Solutions Private Limited

08/2022 - 03/2025

- Built a robust AI application using NVIDIA SDKs like DeepStream, ACE Agent, Tokkio, and Metropolis to solve real-world problems
- Completed a four-month internship focused on exploring machine learning concepts, algorithms, and practical applications.
- Technologies Used: Python, DeepStream, LangChain, Vector Database, LLM, LLM Finetuning, RAG, VLM, Numpy, Pandas, Tensorflow, PyTorch and various Python libraries.

PROJECTS

CleanSea: The Deep Learning Model for Ocean Waste Detection

- Build a project to identify various Hotspots & detailed analysis between many different classes of waste in the epipelagic layer of Ocean
- Technology used: Python , Python modules , HTML & CSS

Real time Face Mask Detection and Email Alert System with Age Prediction

- Developed a system that detects masked and unmasked faces to tackle safety violations, promote face mask usage, and ensure a safe workplace.
- Technology used: Tensorflow , Opencv , Xampp Server

Complaint Management System

- The UI enables online FIR lodging to Police officers & maintains computerized records of all Complaints in the database.
- Technology used: HTML, CSS & Javascript , MySQL

EDUCATION

B.E. (Computer Engineering)
Vivekanand Education Society's Institute of Technology, Mumbai

2018 - 2022 *8.43/10*

SKILLS

Python | Computer Vision | Generative AI | Langchain | Llama | Deepstream | Llamaindex | Yolo | LLM | VLM | RAG | SQL | SQLite | NLP | Vectorstore DB | Inference Pipeline | Docker | Retrieval Pipeline | NumPy | Pandas | TensorFlow | PyTorch | Machine Learning | Deep Learning | CNN | Artificial Intelligence | Cloud Computing | GCP | AWS | Teamwork

CERTIFICATES

Oracle Cloud Infrastructure Digital Assistant Certified Professional

Oracle Cloud Infrastructure Certified Data Science Professional

Building Real-Time Video AI Applications
(Nvidia)

Computer Vision: Python OCR & Object Detection Quick Starter
(Udemy)

PUBLICATIONS

Showcased a Paper at Chem-conflux 22 International Conference (04/2022)
(Presented paper at International Conference on Technological Interventions for Sustainability held by Universiti Sains Malaysia, Malaysia & NIT Allahabad)

Publication in JOITS Journal (e-ISSN: 2581-849X) (11/2021)
(Published a Research paper in JOITS for Ocean Waste Detection Model)

Publication in IJCRT Journal (06/2021)
(Published a Research paper in IJCRT for Face Mask Detection and Alert System with Age Prediction)
